

JACK SHAW

ChatGPT, AI, and Your Future

How Emerging AI Technologies are Transforming Business, Government, and Society

Few new technologies have exploded into our awareness like ChatGPT. Within a week of its initial release November 30, 2022, ChatGPT had millions of people signed on as early testers. Since that time, everyone from journalists to talk show hosts have been discussing ChatGPT and its pros and cons.

But business and governmental leaders still have lots of questions. What is this new technology? How does it work? Can we depend on it? How can we use it to improve our productivity and to better serve our customers?

In this presentation, Jack Shaw discusses the capabilities of ChatGPT and related AI developments. He explains how it generates coherent and human-like responses. And he'll discuss the impact of ChatGPT and AI on various industries and professions.

He'll also explore the ethical considerations surrounding the use of ChatGPT and similar AI models. The ability of these models to generate convincing text raises important questions about the potential misuse of this technology. He'll discuss the importance of responsible development and use of AI models, particularly in light of recent controversies surrounding deepfakes and other forms of synthetic media.

Additionally, Jack will cover recent advances in AI research beyond ChatGPT. These advances have significant implications for a wide range of industries and offer exciting opportunities for innovation and growth.

This presentation on ChatGPT and related AI developments will offer valuable insights into the cutting-edge technologies shaping the future of business and society. It will be of great interest to business executives who are seeking to stay ahead of the curve in this rapidly evolving field. Please be sure to include this topic in upcoming meetings to ensure your organizations are well-informed about the latest developments in AI.

With over 30 years of experience as an Innovation and Technology Strategist, Jack Shaw has helped countless leaders transform their organizations' digital ecosystems amid new waves of technology.

What sets Jack apart is his in-depth understanding of AI and its applications. He has been monitoring and applying AI developments since the 1980s and has spent several years as VP of Commercial Systems for a leading AI technology developer. With this wealth of experience, Jack is uniquely qualified to discuss of ChatGPT, its impact on various industries, and the ethical considerations surrounding the use of AI models.

Jack's expertise has been recognized by both audiences and industry experts. He was voted one of the World's Top 25 Professional Speakers and one of the Top Five Technology Futurists in polls conducted by Speaking.com. He has advised key decision-makers at hundreds of corporations and trade associations around the world, including Fortune 500 organizations such as Mercedes Benz, GE, Coca-Cola, Bosch, Johnson & Johnson, IBM, Oracle, and SAP.

Having delivered over 1,000 keynote discussions and executive forums in 26 countries and every state across the U.S., Jack is a seasoned speaker who knows how to engage audiences of all levels. He is a Yale University graduate, and he has a Kellogg MBA, which underscores his deep understanding of business and technology.

In summary, Jack Shaw is the ideal subject matter expert to speak on ChatGPT and related AI developments. His extensive experience in the field, his recognition by audiences and industry experts, and his ability to engage and educate audiences make him an ideal candidate for this topic.
